RECEIVED

Amendment under 37 CFR §1.111

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Office action dated November 27, 2001 in the above-identified application, please amend the above-identified application as follows.

In the Specification:

On page 33, please replace the abstract paragraph with the following substitute abstract:

B1 The present invention provides a novel inactivated virus particle and a reinforced immunogen which have a reinforced titer about twice to about 10 times that of a conventional vaccine, as well as a method for producing the same. The inactivated virus particle is produced by inactivating and then purifying a culture by physical means. The inactivated virus particle of the present invention is useful in a diagnostic agent for infectious disease caused by a group of Japanese encephalitis virus.
